About me

BSc Computing Science student at Radboud University with a background in VWO Atheneum from Corlaer College. Experienced in fullstack web and embedded development through various professional roles and extracurriculars, including work at AeroCount and Thalia. Also active in sales, social media, and freelance web projects (including development, design, and security, for example pen-testing). Interested in cybersecurity and cryptography, with some experience writing and making CTF challenges. Helped organize tech events, including a generative AI hackathon at Rabobank. Fluent in Dutch and English

Personal

Naturally curious and highly spontaneous, I dive into topics the moment they spark my interest - or when asked - driven by a strong desire to learn, grow, and understand how things work

Areas of specialization

· Data Science · Software Science · Fullstack · Automation ·

Interests

Cybersecurity, puzzle solving, tinkering with electronics and Internet of Things devices

Technologies

Docker / Git / Linux
AWS / SQL / Microcontrollers
R / Android / REST APIs

WORK EXPERIENCE

2025–Present	**Software Developer**
	FULLSTACK · AeroCount 📍
	Contributed to the development of a secure web dashboard for both public users and municipal authorities, enabling data-driven decision-making for air quality regulation. Assisted in upgrading and programming embedded air quality sensors using Embedded C. Led the automation of sensor calibration processes through multiple linear regression in Python, replacing manual methods and significantly improving efficiency and consistency.
2024–2025	**Salesman and Social Media Manager**
	Gastrovino Arno de Laak 📍
	Managed in-store sales and customer relations in a high-end food and wine shop. Oversaw social media strategy and content creation, increasing brand visibility and engagement across platforms. Played a key role in promoting seasonal campaigns and product launches.
2018–2024	**Salesman and Social Media Manager**
	Gastrovino Rob's Kaas en Lekkernijen 📍
	Managed sales and customer relations in a specialty cheese and delicatessen store. Developed and maintained the company website, optimizing user experience and driving online sales. Oversaw social media presence, creating content to increase customer engagement and promote product offerings. Played a key role in seasonal campaigns.
2018–2024	**Web Developer**
	Freelance 📍
	Specialized in developing websites for businesses with a focus on both design and security. I collaborated with healthcare companies on GDPR compliance, data privacy, and cookie agreements. I also conducted extensive penetration testing outside the websites made for these companies, identifying and responsibly disclosing over three data breaches on various websites utilized by Corlaer College.

DEGREES

Current	**Computing Science**
	BSc · Radboud 🏛
2024	**Atheneum**
	Vwo · Corlaer College 🏛

CERTIFICATES

CodeCademy	Python Course
Root-Me	Web - Client pentesting
PicoCTF	2020 CTF
Harvard	Introduction to Python for Data Science
Harvard	Introduction to AI with Python
Harvard	App Development with React Native

PROGRAMMING

JS & Node.js
Python
C++
Java
R

LANGUAGES

Dutch	C2	Mother tongue
English	C2	●●●●
German	B2	●●●○
Spanish	B1	●●○○

Volunteering

2024–Present

Web & App Developer
TECHNICIE · Study Association Thalia 📍
As a member of the committee named "Technicie" at Thalia, I helped in upgrading and maintaining both the app and website of the study association. I also helped discuss and create new features, most notably an AWS Lambda function to create a ZIP file of any newly uploaded photo album.

2024–Present

Member of Partner committee
PARTNERCIE · Study Association Thalia 📍
As a member of the committee named "Partnercie" at Thalia, I helped in talking with and gaining new partners and sponsors for the study associations. Details of the partners are available upon request.

2024–Present

Web Developer
WEBCIE · Student Association N.S.Z.V. Loefbijter 📍
As a member of the committee named "Webcie" at Loefbijter, I helped in upgrading and maintaining both the app and website of the study association.

2023

Generative AI Hackathon
Rabobank 📍
During the rising interest in generative AI within corporate environments Rabobank explored how to effectively educate employees on its utilization. I contributed by hosting fun and informative assignments for generative AI applications, assisting with task grading, and delivering a presentation on best practices for writing prompts.

2021–2023

Capture-The-Flag Creator
The Cyber Desk LTD 📍
As part of a partnership, I created a document of 19 pages, consisting of all different types of challenges: challenges to hack a website I made for the purpose, decrypting a message using a key, etc. These were all released weekly in communities consisting of over 500 programmers and hackers, and later released on the Cyber Desk website.

2021–2022

Software Developer
CHATBOT · The Cyber Desk LTD 📍
Responsible for translating an existing Discord.py bot into a new and improved Discord.js bot. This involved enhancing its functionality by adding new features, improving the user interface, and upgrading security protocols. I focused on optimizing performance, ensuring better scalability, and integrating modern best practices to create a more seamless and secure user experience.
